ANCHOR FIXING FRAMELESS GLASS BALUSTRADES

Glass Anchors

Face fixed bolt-on fixings are used for glass balustrading whereby the glass is mounted off the substrate with a spacer between the glass and the substrate. These can be used for fixing to concrete, timber or steel.

- Manufactured from 316 grade stainless steel or architectural grade aluminium for strength, corrosion resistance.
- An engineered look suitable for most applications, interior and exterior.
- A range of design options: Round (50mm or 100mm diameter) with concealed or exposed fixings, and Square or Rectangular cover options that include the capability to have timber covers to integrate with timbers stairs.
- Various spacer widths available to suit your site and for easy cleaning and for maintenance access.
- Mirror or satin finish stainless steel, or a custom powder-coat colour.
- Co-ordinated handrails and brackets are available to suit.
